**3M, formerly Federal Signal Technologies:** Advanced Interface Software Engineer  
2012-2014

Irvine, California (in office)

**3M, formerly Federal Signal Technologies:** Software Engineer II  
2007-2012

Irvine, California (Remote)

**3M, formerly Federal Signal Technologies:** Software Engineer I  
2005-2006

Irvine, California (Remote)

- 8+ years of steadily increasing responsibility from Software Engineer I, to technical leadership of four software projects.
- Designed, lead, and implemented, with documentation a key Tolling software subject matter expert.
- Responsible for maintaining key vendor relations for one project under project management.
- Responsible for responding to technical writers for RFP (requests for proposals).
- Responsible for maintaining production software across five live projects in an on-call 24/7 environment.
- Improved automated image processing for our (Transportation Corridor Agencies) TCA customer. There was a 30% decrease in need for human entered license plate reviews.
- Delivered an ahead of schedule solution for the TCA video tolling system to handle a tenfold increase in image processing and data storage, including the capability to handle days worth of data smoothly.

## Self Employment / Volunteering

- I've been creating Chickasaw Language specific applications for Chickasaw language teachers and students. [Flash Cards](#)
- I developed the software with Next.js 13.4 with Typescript, React, MongoDB, with accessible Progressive Web Apps on the Vercel serverless platform.
- I also constructed Node.js microservices for the Chickasaw Language word bank on a Linux server with pm2, along with MongoDB.
- Currently, I am utilizing Google Tag Manager, Google Analytics, and Search Console. The Progressive Web Apps are for easy string search, and regex string search for the Chickasaw word bank.
- The second Progressive Web App is for Chickasaw Rosetta Stone lesson word groups, specifically for Chickasaw Community Chickasaw Language learners and their teachers.

- Student / Teacher of Chickasaw Language since 2017.
- With the help and support of the Chickasaw Nation Language Revitalization Department, I was able to create both applications.

## **Education**

Bachelor of Science Degree, **Physics. University of Oregon**, Eugene, OR USA  
**Northwest Indian College**, American Indian/Native American Languages Bellingham, USA
